PROFESSIONAL EXPERIENCE

Operational Excellence & Consulting

He has been implementing Lean, Toyota Production System, and Theory of Constraints to Fortune 500 as well as small companies since 1999. While employed in Seagate Technologies as Corporate Lean Consultant and Head of Supplier Lean Team for Asia he had wide level of success in operational improvement consulting. He was aptly referred to as the **“Constraint Buster”** and **“one of the only 7 out of 45,000 employees who have the skill-set to go into factories and turn it around within weeks”**, by Seagate corporate executives.

“

**“Constraint Buster” and
“one of the only 7 out of 45,000
employees who have the skill-set to go
into factories and turn it around
within weeks”**

”

Victor has been particularly engaged in turning around operational capabilities of large organizations through diagnostics, ‘constraint busting’, operational improvement strategies, complex problem solving, organizational change management and human capital development. He is senior member of the **Society of Manufacturing Engineers, USA**.

His dynamic training facilitation style, motivational speaking ability and hands-on approach to consulting is what is needed to get things done effectively in any clients training and improvement needs.
